

JEFFERSON COUNTY FAIRGROUNDS

COMPOSTING WORKSHOP

Monday, May 12, 2008 at 6:00 p.m.

The Earth Machine

Twist Locking Lid. A lid that functions easily and properly.

Aesthetic Appearance. Its round conical shape makes it aesthetically pleasing.

Rodent Resistant. It secures to the ground by use of twist pegs (they really work), securable access door, and locking lid.

Ease of Assembly. Two piece assembly that fits together in seconds, without use of any tools.

Durability. It is made of tough high density polyethylene.

Ease of Transportation. It will fit into any automobile for ease of transportation and comes packaged in two halves (no corrugated packaging) which nest inside of each other.

Access and Interior. Easy access through the large lid opening, easy turning and aerating, no ridges or corners for materials to stick in, design allows for easy batching and good quality compost.

Includes a composting guide.
